EDUCATION

Master in Data Science

University of Sydney
2026|SYD, Student

Master in ICT

University of Sunshine Coast
2025| QLD, Australia

Graduate Certificate in ICT

University of Sunshine Coast
2023| QLD, Australia

Certificate IV in IT

TAFE New South Wales
2017| NSW, Australia

Advanced Diploma in Mathematics & Physics

Secondary Education
1998| THE, IRAN

SKILLS

- Communication
- Teamwork
- Critical thinking
- Time management
- Leadership
- Adaptability
- Project Management

Professional Overview

Dynamic IT Infrastructure Engineer with 17+ years of experience across Australia, UAE, and Iran, delivering secure, scalable, and automated enterprise IT systems including design, automate, and maintaining enterprise-grade Microsoft, cloud computing, and hybrid infrastructures across Australia and international environments. Specialised in Microsoft 365 full complete modules, cloud architecture (Azure/AWS), Entra ID, automation (PowerShell/Python), Power Platform (data analytics) including Power apps, Power BI, Power Automation, endpoint management, networking, internal application hosting, hybrid identity, PowerShell automation, and end-to-end infrastructure transformation and system optimisation. Recognised for reducing infrastructure costs by up to **90%**, creating highly available systems, and providing expert Wintel/Cloud support to over **7,000+ global users** across complex environments.

Experienced in cross-functional collaboration with engineering, DevOps, security teams, and delivering solutions that strengthen organisational productivity, operational resilience, and system security. Currently expanding my expertise further as a **part-time Data Science student at the University of Sydney**.

Adept at leading infrastructure projects, reducing operational overhead through automation, collaborating with engineering and security teams, and establishing global IT standards. Recognised for delivering innovative technical solutions, enabling operational excellence, and driving ongoing improvements in complex environments.

Infrastructure & Cloud Engineering:

- Microsoft 365, Azure, Entra ID (Azure AD), Exchange Online, Intune, Endpoint Manager.
- Hybrid cloud infrastructure design, identity management, backup & recovery (Veeam, Azure Backup), Windows Server (2000–2022), Active Directory, DNS, DHCP, IIS, PKI

CERTIFICATES

Microsoft Certified AI- 900
2024| SYD, Australia

**Microsoft Certified in
Cybersecurity – SC 900**
2024| SYD, Australia

IT Python Specialist
2024| SYD, Australia

**AWS Cloud Practitioner
Essentials**
2025|SYD, Australia

**Microsoft Certified Solutions
Associate | MCSA**
2012| SYD, Australia

**Microsoft Certified System
Engineer 2008 (MCSE)**
2008|MAL, Kuala Lumpur

Professional (MCITP)**
2008|MAL, Kuala Lumpur

**Microsoft Certified Technology
Specialist (MCTS)**
2008|MAL, Kuala Lumpur

**Microsoft Certified Professional
(MCP) C#.Net, 2008|UAE, Abu
Dhabi**

**Microsoft Certificate System
Administrator MCSA 2000/2003**
2004|TRK, Ankara

Microsoft Certified Professional
2004|TRK, Ankara

Automation & Scripting

- Advanced PowerShell for provisioning, compliance, user lifecycle, monitoring, reporting, and configuration tasks
- Python scripting for system management and automation
- Experience with LLM-driven automation concepts and Copilot integrations

Networking and Security

- VLANs, VPNs, ACLs, routing, firewalls, layering switching (Cisco/Juniper)
- Network security alignment to CIS, NIST, Essential 8
- Security baselines, identity hardening, Conditional Access, MFA, Zero Trust

Systems, DevOps & Application Hosting

- VMware ESXi, Hyper-V, Failover Clustering, SAN, VDI, Citrix XenApp
- Azure DevOps, GitHub, CI/CD fundamentals, Terraform (basic)
- Jira, Confluence, Atlassian administration
- Monitoring: Azure Monitor, custom PowerShell dashboards

End-User Computing

- Windows, macOS, Linux administration
- Intune, SCCM, imaging, onboarding automation

Core Strengths and Qualities Key

- **Microsoft Infrastructure** (AD, Group Policy, DNS, DHCP, Hyper-V, Exchange)
- **Cloud Technologies:** Azure, Microsoft 365, Entra ID, AWS, Data Engineering DataBricks
- **Automation & Scripting:** PowerShell (advanced), Python in VS
- **Networking:** Cisco routing/switching, VLANs, VPN, ACL, STP
- **Virtualisation:** VMware ESXi, Hyper-V, Citrix XenApp, VDI
- **Endpoint Management:** Intune, SCCM, imaging, macOS/Windows/Linux
- **Security Frameworks:** NIST, CIS, Essential 8, MFA, Conditional Access
- **DevOps & Tools:** Azure DevOps, GitHub, Terraform (basic), Jira, Confluence
- **Solution Architecture & Project Delivery:** AWS, Azure
- **Customer Success, Training, Mentoring, Documentation**

TECHNICAL SKILLS

Cisco Switches: Catalyst 2960/2670/3560/3750 & ISR 1800/1900/2800 and 2900. **Jupiter Ex** Series, 2200

Network Device: Wired and Wireless Adapters, Switches, Access Points, Wired/Wireless Routers, Firewall, VPN, LAN, WAN

Configuration Tools:

SCCM 2012/2016/2019
SCDPM 2010/2016/2019

Remote skills: RDP, VNC and TeamViewer, Google remote desktop

Anti-Virus: Bit defender, Symantec Endpoint Security, Kaspersky Antivirus, Avira Antivirus, File Server Security and Symantec Antivirus

Infrastructure: Active Directory infrastructure, Group Policy, Azure Architecture

Cloud Computing and

Virtualisation: VMware ESXi, VMware vSphere, Hyper-V, Azure, Amazon (AWS), Google Cloud

Microsoft Team Video Conferencing and project controlling **with SharePoint Site**

Security: MFA, CA, CIS, NIST, Essential 8 hardening

Carrer Summary

IT Infrastructure Manager, IT Service Link, Sydney-Epping (Solo Trader)	2013-CUR
IT Field Support Engineer, Bios Computers, Leichhardt	2012 - 2013
IT Field Support Engineer, Funeral and Memorial Services Pty Ltd, Guildford	2010 -2012
Support Manager/Network Systems Engineer, FaraGostar Co, Dubai/UAE/Tehran	2006 - 2010
Network Engineer, Shampoo Cedr Sehat Co, Tehran, Iran	2003 - 2006

Work Experience

IT Field Infrastructure and Cloud Support Engineer

IT Services Link, Sydney | Nov 2013 – Current

An Australian company, IT Services Link, features experienced professionals who specialise in solving business problems and customising IT solutions. They offer a full range of services, including IT management, network installation and monitoring, and website design. Their clients include Transit Systems NSW, Baharestan Exchange, Cash Stop, Dental Advance Care and Associates, and Music School Francoise in Sydney.

Key Responsibilities

- Designed, implemented, and maintained on-premises Active Directory (AD), DNS, RDP, and OU policies for Windows Servers 2012, 2016, 2019, and 2025, managing Entra ID users, MFA, Endpoint manager, Azure portal consol management.
- Provided Level 3 Wintel support, resolving issues with printing, domain joining, AD accounts, Microsoft 365 configuration, problem solving and messaging services.
- Developed and upgraded websites using WordPress, PHP, HTML, Python, and MySQL.
- Troubleshoot print servers, workstations, and systems via RDP, TeamViewer, Google Remote Desktop, Intune admin centre, and Autopilot.
- Configured and maintained servers, printers, firewalls, storage devices, and Symantec Enterprise Vault.
- Delivered hardware/software upgrades for over 300 users, including Windows 7/10/11 and MS Office 365.
- Conducted weekly client training on Windows 10, MS Office 2019, and Office 365.
- Designed and implemented VLANs, NATs, ACLs, advanced routing, and layer 2/3 switching using Cisco hardware.
- Analysed network security strategies and recommended tailored solutions.
- Managed IT services such as AD, DNS, DHCP, FTP, mail, backup, and antivirus systems.

Key Achievements

- Maintained a strong reputation for client satisfaction, ensuring repeat business, especially during COVID-19.
- Streamlined workflows using Service Link Cloud computing for efficient, timely service delivery.
- Reduced physical server costs by 90% through cloud services, clustering, and remote application deployment.

COMPUTER SKILLS

Operation Systems: Windows NT/98/2000/XP/7/8/10/11

Server OS: Windows Server 2003/2008/2012/2016/2019/2025
SBS:2003/2008/2012/2016

Microsoft 365 E3, E5
Exchange Server:
2000/2003/2007/2010/2012/2016
/2019 and Online Exchange

MS-SharePoint Online

MS-Purview

MS Office 365

Citrix, XenApp Server, XenApp Desktop

Linux Red Hat Enterprise server 4,5

SQL Database: MS SQL Server, 2000, 2005, 2008,2012

Software: Visual Studio, C#.Net, SharePoint, Delphi7, PHP4, HTML, CSS, WordPress CMS, Joomla CMS, The WIX Development site, Python, Jupiter

PM Apps: MS Project, Project in a Box

Zoom conferencing and video recording for training and support team

CompTIA A+

Hardware recovery Assembling Servers & PC

Implementation Network Cabling

Data Science: DataBricks

Wintel Support Engineer

Bios Computers, Leichhardt | Sep 2012 – Nov 2013

Australian-owned IT company providing full management and support services, including network design, installation, and monitoring for reliable operations. Clients include LJ Hooker, Demlakian, Cash Stop, ABC Corporation, Hugh Meagher & Associates, and Alliance Francaise de Sydney. Reports to Managing Director.

Key Responsibilities

- Designing, implementing, installing, supporting, and maintaining Migrant AD and DNS from Windows 2003 to Windows Server 2008 and network communications systems.
- Implementing, installing, and supporting VMware ESXi 4.1, Virtualisation, Forefront 2010, and Private cloud with Hyper-v
- Designing, implementing, installing, supporting, and maintaining Exchange Server 2010
- Liaising and working together with other staff members to solve problems for clients quickly and effectively
- Designing and implementing new websites with word press, PHP, and HTML
- Developing new, rebuilding, or upgrading Hardware and Software to support end users at the user level
- Troubleshooting/analysis of servers, workstations, and associated systems

Key Achievements

- Developing an excellent internal/external client reputation, resulting in generating strong repeat business.
- Contributing to employer revenue by 65% and client cost savings by 70%.

IT Field System Engineer

Funerals and Memorial Services, Sydney | Dec 2010- Sep 2012

Funerals and Memorials Pty Ltd is an Australian-owned company that provides funeral services to clients. Reporting to -the CEO - this role is part of the business's backend support services.

Key Responsibilities

- Designed, implemented, and migrated Active Directory (AD) and DNS from Windows Server 2003 to 2008, managing a team of 8, including network engineers and IT managers.
- Installed and maintained Forefront 2010, Hyper-V, VMware ESXi 4.1, Citrix XenApp server, and Virtual Desktop Interface (VDI) for funeral applications.
- Provided Level 1–3 support for hardware, software, printing, domain connectivity, and messaging services.
- Clustered storage area networks (SANs) with resources like HP DL-180 and extended them to remote locations for backup and archival.
- Designed and developed websites using WordPress, PHP, and HTML.
- Installed and secured Cisco routers, switches, firewalls, Microsoft ISA Server 2006, xDSL modems, and other network equipment.
- Configured and administered Exchange Server 2010, domain controllers, print servers, and various IT devices.
- Delivered client training sessions on Windows XP/7 and MS Office 2007/2010.
- Planned and executed upgrades for over 300 computers to Windows 7 and MS Office 2007/2010.
- Implemented VLANs, NATs, ACLs, advanced routing, and layer 2/3 switching using Cisco hardware.

- Analysis network security strategies and proposed tailored solutions.
- Managed IT services such as AD, DNS, DHCP, FTP, mail, backup, and antivirus.
- Rebuilt, upgraded, and developed hardware/software for user-level support.
- Diagnosed and resolved server and workstation issues.

Key Achievements

- Enhanced business operations by analysing and implementing effective IT solutions, driving consistent growth.
- Saved over \$400,000 by creating 135 websites, managing 255 domains, and transitioning hosting services, including key sites like www.cosmopolitanfunerals.com.au, www.orthodox.com.au and www.jamesmurray.com.au.
- Reduced physical server costs by 90% through virtualisation, clustering, and deploying remote applications for customer funeral arrangements.

Support Manager and System Administrator

FaraGostar Co. (Dubai/UAE & Tehran/Iran), Cedr Sehat Co Apr 2003 –Nov 2010

Key Responsibilities

- Engineered SharePoint, MIS systems, VMware environments, and secure LAN/WAN networks.
- Administered AD, firewalls, intranet services, and enterprise apps.
- Led IT operations for over **7,000 users** across Middle East organisations.

Achievements

- Achieved **\$900,000 annual savings** through infrastructure optimisation.
- Strengthened security posture with enterprise-wide policies and network redesign.

Training Courses

- Power BI, Python, Jupiter and ML Modelling Australia, 2022-2024
- Microsoft Security and CCNA, Microsoft Company, Turkey, 2004
- Infrastructure, Microsoft, Malaysia, 2002
- Exchange 2000, ISA Server 2000, Microsoft Company Malaysia, 2003-2004
- Active Directory, Microsoft, Malaysia 2001
- Advance Server 2021+Windows 11 online
