EDUCATION

Master of Data Science

The University of Sydney
Current | NSW, Australia

Master of ICT

University of the Sunshine Coast
2025 | QLD, Australia

Graduate Certificate in ICT

University of the Sunshine Coast
2023 | QLD, Australia

Certificate IV in IT

TAFE New South Wales
2017 | NSW, Australia

Advanced Diploma in Mathematics & Physics,

Secondary Education
1998 | Tehran, IRAN

**AWARD-WINNING ENTERPRISE TECHNOLOGY LEADER SPECIALISING IN AI
AUTOMATION, CLOUD INTEGRATION,
AND
MICROSOFT ECOSYSTEM TRANSFORMATION ACROSS
AUSTRALIA AND ASIA PACIFIC.**

PROFESSIONAL SUMMARY

Senior ICT System Engineer and AI Automation Leader with 16+ years of experience delivering enterprise cloud transformation, integration architecture, and AI-augmented automation across Australia, the UAE, and Asia. Recognised at international technology conferences in Australia, Spain, France, and Dubai for driving measurable business innovation.

Based in Sydney, I lead an AI and managed IT consulting practice with hands-on strategic ownership of the Microsoft enterprise stack, including Microsoft 365, Power Platform, Azure Integration Services, Dynamics 365, Active Directory, Windows Server, and Hyper-V, bridging legacy on-premises infrastructure with modern cloud-native architectures.

Previously, as ERP & MIS Support Manager, I led software support and CI/CD operations for over 7,000 company clients, managing enterprise-scale service delivery, release management, and development workflows across multi-site environments.

Key business outcomes delivered:

- 90% reduction in server infrastructure costs
- \$400K+ in measurable client savings
- 45% increase in client revenue
- 70% reduction in IT operating expenses
- Enterprise-scale CI/CD for 7,000+ business clients

My academic journey reflects my commitment to continuous growth. Having already earned a Master of ICT and a Graduate Certificate in ICT from the University of Sunshine Coast, I am now deepening my expertise through a Master of Data Science at the University of Sydney. This progression directly strengthens my ability to lead at the intersection of enterprise automation, AI integration, and data-driven strategy.

CERTIFICATES

- AWS Cloud Essentials (2025)
- Microsoft Certified AI - 900 (2024)
- Microsoft Cybersecurity – SC 900 (2024)
- IT Python Specialist (2023)
- Microsoft Certified Solutions Expert, Australia (2012)
- VoIP (2019)
- Microsoft Certified IT Professional (MCITP), Dubai (2010)
- Microsoft Certified Technology Specialist (MCTS), Dubai (2010)
- Microsoft Systems Engineer (2008)
- Microsoft Certified System Engineer (MCSE) Engineer Specialist 2000/2003/2008
- CCNA (2008)
- Microsoft Certified Professional (MCP) C#.Net, Ankara (2008)
- Microsoft Certificate System Administrator (MCSA) 2000/2003/2008
- (MCP) Microsoft Certified Professional (2004)

CORE COMPETENCIES

- Microsoft 365 | Power Platform
- Azure Integration Services
- AWS (EC2, S3, RDS, VPC)
- AI/ML Enterprise Adoption
- Dynamics CRM / Dynamics 365
- Enterprise Integration Architecture
- Cloud Migration & Optimisation
- Backup & DR (Veeam, Zerto, Azure Site Recovery, Commvault)
- Low-Code / No-Code Development
- REST APIs & Event-Driven Architecture
- Automation & Workflow Design
- Cross-Functional Team Leadership
- IT Governance & Best Practices
- Agile & Hybrid Project Delivery
- Cybersecurity & Network Security
- Python, SQL & Data Analytics
- Stakeholder & Vendor Management

CAREER SUMMARY

- **Senior ICT System Engineer & AI Consultant** | IT Service Link, Sydney 2013 to Current
- **IT System Engineer** | Funeral and Memorial Services Pty Ltd, Sydney 2010 to 2013
- **ERP & MIS Support Manager & Network Systems Engineer** | FaraGostar Co, Dubai, UAE / Tehran 2003 to 2010

PROFESSIONAL TRAINING AND DEVELOPMENT

- Microsoft Power Platform (Power BI, Power Automate, Power Apps) – 2022
- Python Programming – 2023-2024
- Jupyter Notebook & ML Modelling – 2022-2024
- Advanced Windows Server 2021 & Windows 11 – Online
- Windows Server 2025 – Microsoft Learn (2025)

PROFESSIONAL EXPERIENCE

Senior ICT System Engineer & AI Consultant

IT Services Link, Sydney | 2013 – Current

IT Service Link is a Sydney-based managed IT services and AI consulting firm delivering cloud migration, enterprise automation, Microsoft 365, Power Platform, and digital transformation services to clients across Australia, including clients across financial services, Transport services, healthcare, real estate, and education sectors in Sydney.

Cloud & Infrastructure:

- Architect and deploy Azure cloud environments and Azure Integration Services, enabling seamless data flow and scalability across multi-platform business ecosystems.
- Reduce client server infrastructure costs by 90% through strategic cloud migration, clustering, and virtualisation, replacing legacy on-premises environments with scalable cloud platforms
- Administer Microsoft Dynamics CRM configurations and integrations, supporting sales pipeline management and customer data governance.

AI & Automation

- Design and deploy intelligent automation workflows using n8n AI agent orchestration, integrating OpenAI GPT and Anthropic Claude into enterprise workflows.
- Leverage GitHub Copilot, Claude, and ChatGPT, collectively reducing manual workload by an estimated 40% and freeing capacity for high-value client outcomes.
- Deliver AI consulting services advising enterprise clients on practical integration of foundation AI models into operational workflows and decision-making frameworks.

HANDS-ON TECHNICAL SKILLS

Networking & Security

- Cisco Catalyst switches (2960, 3560, 3750), ISR routers (1900, 2900), Juniper EX Series 2200
- Firewalls, VPN, ISA Server, Cisco ACLs, VLANs, NAT
- Essential 8, NIST, ACSC, Zero Trust, Azure Security Centre, RBAC, IAM

Cloud & Virtualisation

- Microsoft Azure (IaaS, PaaS, Integration Services, Site Recovery)
- AWS (EC2, S3, RDS, VPC)
- VMware ESXi, vSphere, Hyper-V

Endpoint & Infrastructure Management

- Microsoft Intune / Endpoint Configuration Manager (MECM, formerly SCCM)
- Microsoft Defender for Endpoint (formerly SCEP)
- Active Directory, Group Policy, DNS, DHCP

Scripting & Development

- PowerShell, Bash, Python, SQL
- GitHub, VS Code, Jupyter Notebook

Productivity & Collaboration

- Microsoft 365 (Teams, SharePoint, Exchange Online, OneDrive)
- Zoom, video conferencing, training recording

Backup & Disaster Recovery

- Veeam, Commvault, Zerto
- Azure Site Recovery
- System Center Data Protection Manager (SCDPM)

Security & Compliance (Essential 8, NIST, ACSC, Zero Trust)

- Implement Zero Trust architecture principles across client environments, including MFA, Conditional Access, and least privilege RBAC through Azure Active Directory.
- Enforce Essential 8 mitigation strategies, including application whitelisting, patch applications, restrict administrative privileges, and enable daily backups.
- Align security posture with NIST and ACSC frameworks, deploying Azure Security Centre policies, Cisco firewall configurations, and endpoint protection.
- Design network micro-segmentation strategies using Azure Virtual Networks and Cisco ACLs, reducing lateral movement risk by isolating critical workloads.

Integration & API

- Promote API-first, modular application architectures and establish integration governance frameworks across client environments.
- Lead data flow optimisation initiatives, connecting cloud SaaS platforms via REST API integrations and middleware solutions to eliminate manual handling.
- Build and manage Power Platform solutions (Power Apps, Power Automate, Power BI), driving low-code/no-code adoption across business units.

Key Achievements

- **Reduced** internal manual workload by an estimated **40%** through n8n AI agent automation and integrated AI tool workflows, freeing capacity for strategic client delivery.
- **Delivered** a **45%** increase in client revenue and a **70%** reduction in IT operating expenses through targeted technology transformation programmes.
- **Recognised** at international technology conferences in Australia for outstanding contributions to enterprise IT innovation and performance.

IT System Engineer

Funerals and Memorial Services, Sydney | 2010-2013

Funerals and Memorials Pty Ltd is an Australian-owned company that provides funeral services to clients. Reporting to -the CEO - this role is part of the business's backend support services.

Key Responsibilities

- Designed, implemented, and migrated Active Directory (AD) and DNS from Windows Server 2003 to 2008, managing a team of 48, including network engineers and IT managers.
- Installed and maintained Publisher 2010, Hyper-V, VMware ESXi 4.1, Citrix XenApp server, and Virtual Desktop Interface (VDI) for funeral applications.
- Provided Level 1–3 support for hardware, software, printing, domain connectivity, and messaging services.
- Clustered storage area networks (SANs) with resources like HP DL-180 and extended them to remote locations for backup and archival.
- Designed and developed websites using WordPress, PHP, and HTML.

- Installed and secured Cisco routers, switches, firewalls, Microsoft ISA Server 2006, ADSL modems, and other network equipment.
- Configured and administered Exchange Server 2010, domain controllers, print servers, and various IT devices.
- Delivered client training sessions on Windows XP/7 and MS Office 2007/2010.
- Planned and executed upgrades for over 300 computers to Windows 7 and MS Office 2007/2010.
- Implemented VLANs, NATs, ACLs, advanced routing, and layer 2/3 switching using Cisco hardware. Analysed network security strategies and proposed tailored solutions.
- Managed IT services such as AD, DNS, DHCP, FTP, mail, backup, and antivirus. Diagnosed and resolved server and workstation issues. Rebuilt, upgraded, and developed hardware/software for user-level support.

Key Achievements

- **Enhanced business operations** by analysing and implementing effective IT solutions, driving consistent growth.
- **Saved** over **\$400,000** by creating **135** websites, managing **255** domains, and transitioning hosting services, including key sites like www.cosmopolitanfunerals.com.au, www.orthodox.com.au and www.jamesmurray.com.au .
- **Reduced** physical server infrastructure costs by 90% through server consolidation, virtualisation, and SAN clustering, modernising the legacy on-premises environment.

ERP & MIS Support Manager and System Administrator

Faragostar Co, Dubai and Tehran | 2003-2010

- Engineered Management Information Systems (MIS) and architected SharePoint collaboration solutions for enterprise-wide service maintenance.
- Implemented Microsoft Dynamics CRM 4.0, connecting sales, support, and development teams for financial issue tracking and structured debugging workflows.
- Led software support and CI/CD operations for over **7,000** company clients, managing enterprise-scale service delivery, release management, and development workflows across multi-site environments.
- Designed a web-based knowledge base system serving internal teams and external stakeholders, including site administrators and client teams.
- Established CI/CD pipeline ensuring consistent release standards and on-demand service delivery for **7,000+** clients.
- Oversaw VMware and Citrix virtualisation infrastructure across multi-site environments.
- Administered secure LAN/WAN networks, maintained domain controllers, and supported over 300 users.

Key Achievements

- **Achieved \$900,000** in annual cost savings through virtualisation, automation, and infrastructure optimisation.
- **Grew** client base by **7,000** users through strategic technology delivery and support excellence.
- **Recognised** at international technology conferences in Spain, France, and Dubai for outstanding contributions to enterprise IT innovation and performance.
